86.5 % of active principles

100 % of total ingredients are of natural origin

### Active principles

- Camelia oil : Used for centuries by Japanese women, it possesses genuine nourishing and softening virtues and remoisturizes\* dry spots.
- Castor oil : First cold pressed from the seeds of the Ricinus Communis, recommended for external use to strengthen the skin. It also fortifies dry, devitalized, split and brittle hair. Its name in English often leads to confusion.
- Sweet almond oil : First cold pressed oil, very rich in vitamins A and E, acknowledged for soothing and softening irritated skin.
- Jojoba oil : This first cold pressed, calming and softening oil, rich in unsaponifiable agents, is remarkably friendly to the skin.
- Avocado oil : Rich in vitamins A , D and E, this oil is acknowledged for its moisturizing\* and regenerating properties and particularly recommended for dry and devitalized skin. An excellent anti-wrinkle oil, it also prevents stretch marks.
- Olive oil : Rich in fatty acids and vitamins, it is famous for its nourishing, emollient and protective properties. It is ideal for dry skin with a tendency to severe dryness.
